

Patent Claims

1. A method for fixing, in particular for re-fixing, clothes hanger hooks (12) in a clothes hanger body (11), characterized in that the clothes hanger hook (12) is wetted, in particular in the region of a clothes hanger hook stem (13), with an adhesive (17) and in that, in the region of a connecting point between clothes hanger hook (12) and clothes hanger body (11), the adhesive (17) penetrates a gap (20) between clothes hanger hook (12) and clothes hanger body (11).

2. The method as claimed in claim 1, the adhesive (17) being applied to the clothes hanger hook (12) with a pipette (15).

3. The method as claimed in claim 2, the pipette (15) being elastic at its free end.

4. The method as claimed in claim 2 or 3, the pipette (15) touching the clothes hanger hook in the region of a clothes hanger hook stem (13).

5. The device as claimed in claim 4, the free end of the pipette being positioned and aligned in such a manner that an overcrossing with the clothes hanger hook stem (13) is produced.

6. The method as claimed in one of claims 1 to 5, the adhesive (17) being a capillary flowable adhesive (17).

7. A device for fixing, in particular for re-fixing, clothes hanger hooks (12) in a clothes hanger body (11) of a clothes hanger (10), with an adhesive applicator which comprises a pipette (15) and which is assigned to a transporting device for transporting clothes hangers (10), the pipette (15) being positioned with its free

end in the region of the path of movement of the clothes hangers (10) in such a manner that, during the transporting of the clothes hangers (10), the pipette (15) with a free end successively in each case touches  
5 a clothes hanger hook (12).

8. The device as claimed in claim 7, the pipette (15) being elastic at its free end.

10 9. The device as claimed in claim 7 or 8, the pipette (15) touching the clothes hanger hook (12) in the region of a clothes hanger hook stem (13).

15 10. The device as claimed in claim 9, the free end of the pipette (15) positioned and aligned in such a manner that being an overcrossing with the clothes hanger hook stem (13) is produced.

20 11. The device as claimed in one of claims 7 to 10, an adhesive (17) applied with the pipette (15) being a capillary flowable adhesive (17)
